

## **Additional Roof Guidelines**

The hail storm Lakeline Oaks experienced on Wednesday, March 26, 2009, caused many homeowners to replace their roofs and in some cases gutters. During that time, the ACC approved additional colors that were brought forth by residents and deemed still in line with the original “Weathered Wood” color. Please find the approved roof shingle colors below:

Brand: GAF-Elk Color: Weathered Wood—Original color

Brand: GAF-Elk Color: Cool Weathered Wood in the Cool Color Series-Energy efficient option

Brand: Owens Corning Color: Driftwood-This is the approved option in that brand as the Weathered Wood color is not available in the appropriate weight.

**\* Please note that shingles should be, at a minimum, 30-year shingles.**
